

# UNION FRONT PLANER 65 MM

FRONTAL PLANER FOR WOOD AND SPECIAL FIBERGLASS FOR OSMOSIS TREATMENTS

Cod. **UPV65** planer 65 mm € 686,00

**LESS  
THEN  
2,3 kg**

**FRONTAL USE ON WOOD  
AND FIBERGLASS  
SURFACES (SPECIAL  
AGAINST OSMOSIS)**

Unique and innovative tool, frontal planer motor 220 v - 1200 w 2800/10000 rpm with the milling cutter 65 mm with 3 triangular knives 22 mm in tin - aluminum dustproof cap for use in the total absence of residual dusts with regulation through screws with the milling depth from 0 to 3 mm. Used by a skilled operator who must always maintain the suction bell parallel to the surface, starting from a basic any point (example) of a hull of a boat previously brought to the depth of departure, it removes with maximum efficiency, precision and speed all the surface from 0 to 3 mm in excess, the cutting only partially lateral to the suction bell, that pretends as end of stroke, allows the operator (always keeping the bell parallel to the surface), in total safety, to come back several times in the same spot without further opportunity of milling beyond the initial plane. Particularly suitable for removing millimeter of cot gel layers for anti-osmosis treatment on fiberglass boats.

## TECHNICAL SHEET

Direct transmission  
 Motoe 1200 W  
 2800 - 10000 RPM  
 ELECTRONIC
